Join us for an exciting, inspirational, and educational class as we explore some basics of Jung's work and his teachings about the personal and collective unconscious. The fourth class will be taught by virtual Prayer Chaplain and fabulous Organizational Developmental Consultant, congregant Rebecca Thompson. She will provide Myers-Briggs tests for us to take and will explain this amazing system which has its roots in the work of Carl Jung.

Carl Jung was the radical and inspirational Swiss psychologist and psychiatrist who founded analytic psychology. His work has been influential in psychiatry and in the study of religion, literature, and related fields. He developed a characteristic and unique way of understanding the human psyche and its functioning. Certain of his concepts have entered everyday language, such as introversion and extroversion, complex, archetype, etc. He differed from Freud in his study of the unconscious because he explored spirituality and mysticism.
